

Project Milestone 3 - Demo

Group 2: Buff Buddies

Alex Mazur

Aileen Ma

Owen Carlson

Brianna Griffin

What features were completed?

- User account creation and login with simple form validation
- Storing information to a database (MongoDB)
- Making API calls to openWeather and Google Directions
- Providing data from backend API calls to frontend and showing in 'weather cards'
- Allows user to search for locations and create a list of 'weather cards'
- Displays time of travel to each location

TA suggestions:

- Pair programming
- More direction communication
